60 Hours Highly Interactive Workshop

Overview

Tamil is one of the major languages of southern India. It is spoken principally in the state of Tamil Nadu, located on the eastern coast and extending down to the southernmost tip of the Indian subcontinent. There are about 60 million Tamil speakers in India. In addition it is spoken by about 4 million people in north-eastern Sri Lanka, about one million in Malaysia, and in smaller colonies in Singapore, and parts of East Africa. Tamil is the oldest and most richly developed of the Dravidian languages. The origin of the alphabet (Tamil script) is uncertain, though it is believed to be about 1,500 years old. "**Curry**" is a Tamil word that entered the English language. Other Dravidian languages like Malayalam, Kannada and Telugu have close affinities with Tamil. Tamil also has a substantial classical literature dating back to about the 7th century A.D.

Sieger employ progressive and learner-centered teaching methodologies to enhance learning and believe in encouraging Participants to be actively involved in various classroom activities that allow them to interact with fellow participants and their facilitators. Partner and group work are standard features of the language classes which are usually restricted in size to ensure maximum individual attention and interaction. This course ensures that the language proficiency is built up gradually through communication and the application of structures, vocabulary and strategies. With these, we want students to look forward to their next language class after every lesson and be able to move up the levels of proficiency.
